Dear Hiring Manager,

I was excited to see this opportunity, as it closely aligns with my background in IT project management, product leadership, and automation-focused solution design. With over 20 years of experience delivering scalable digital systems, and as the **current Chief Product Officer at Smart MasterKey**, I am confident that my skills would bring strong value to your team.

In my CPO role, I lead the product vision and development of our cloud-based mobile access platform, working with engineering, design, and commercial teams to deliver secure, scalable solutions for real estate, multifamily housing, and critical infrastructure. This has strengthened my expertise in API integrations, Agile delivery, enterprise security, and customer-driven product development.

Across my career, I have held roles in IT project management, business development, and system automation, delivering improvements for organisations such as CA Technologies, Zetes Ltd., Eesti Energia, Modera, 1Office Group, and birkle IT. I have managed key accounts, coordinated distributed teams, and delivered complex solutions that streamline operations and enhance business performance. I also bring over 18 years of web development experience, including projects for Nissan and Jamiroquai (EMI Music).

Likewise, I have built a strong professional reputation, supported by **47 LinkedIn recommendations**, reflecting my leadership, collaboration, and ability to deliver results. Furthermore, I take pride in driving innovation, simplifying complexity, and ensuring projects are executed with clarity and impact.

I would welcome the opportunity to discuss how my experience as a senior product and IT leader can support your organisation's goals. Thank you for considering my application.

I look forward to connecting.

Michael Maton
